

Away-from-Home Water Checklist

Keep a private household plan for alerts, contacts and device limitations. This is not a recommendation to close any valve or change equipment settings.

Understand your setup

Equipment model and manufacturer instructions location

Person who confirmed the installation and settings

What is and is not covered by the device

Water-dependent systems the installer considered

Confirm alert and response arrangements

Manufacturer-supported check completed, date and outcome

Who receives alerts and has agreed to respond

Private contact details and permitted access arrangements

Professional service contact and escalation instructions

Away-from-Home Water Checklist - continued

Record limitations before leaving

Expected behavior during internet loss

Expected behavior during power loss

Manufacturer-supported recovery instructions location

Questions still requiring professional advice

After returning

Alerts or unusual events to discuss with the service provider

Changes to contact details or equipment

Next check according to the manual or service advice

Use the current equipment manual and professional advice. This record is not an inspection, diagnosis or guarantee.
